

NYU Langone Dental Medicine
Postdoctoral Residency Programs

Advanced Education in Pediatric Dentistry (PEDS)

In The Complex World
of Modern Dentistry
Experience Matters

MAKE *YOURS*
EXTRAORDINARY

SUPERIOR PREPARATION

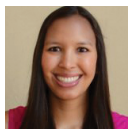

This is a 24-month, ADA-CODA accredited hospital and health center based program. The curriculum emphasizes pediatric medicine and dentistry, the behavioral and pharmacological management of children, oral biology for the pediatric dentist, and general anesthesia.

Graduates are well-prepared in all areas of pediatric dentistry and will become contributing members of the health care team in a hospital environment, community healthcare facility or private practice.

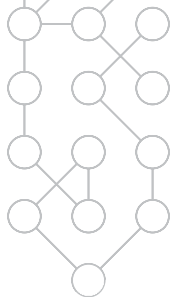

BECOME *YOUR* EXTRAORDINARY

REAL-LIFE TRAINING

"I highly recommend NYU Langone Dental's Pediatric Residency Program. It teaches you the nitty gritty – how to interact with parents and patients, what and what not to treat. I learned so many different treatment philosophies from my attendings and co-residents who are all so collaborative. It is a family who helps mold you into the type of provider you want to be in the future."

Allie Inouye,
Pediatric Resident,
PGY2, 2018,
El Rio Community
Health Center

PEDS AT-A-GLANCE

- This innovative program is a hybrid blend of a strong distance-learning didactic curriculum (25%) with extensive clinical experiences (75%).
- Upon graduation, the resident is awarded a Certificate in Pediatric Dentistry, meeting the advanced education eligibility requirements of the American Board of Pediatric Dentistry.
- The program places a large emphasis on pediatric sedation, pediatric general anesthesia, and pediatric medicine.
- Residents become exceptionally well-trained in the diagnosis and treatment of emergencies and trauma.
- Training with specialists in all disciplines of dentistry, including but not limited to orthodontics, periodontics, endodontics, dental public health and the treatment of patients with special healthcare needs.
- 94.4% of NYU Langone Hospital Peds dental graduates have historically passed the AAPD written qualifying exam – as compared to the national average of 90%.
- All dental residents present cases and discuss treatment plans and options via live video teleconference to all of NYU Langone Pediatric Dentistry residents stationed around the country.
- Attractive and competitive stipend as well as comprehensive fringe benefits are offered.

REAL-WORLD EXPERIENCE

“We give the resident real-world experience so that when they do graduate they are comfortable going into any situation, whether that be in a hospital, a private practice, or a health center. They can step into any oral healthcare situation and feel confident. Some of our residents have even gone into academics. So really, they’re ready for anything that they choose.”

Daniel Kane, DMD, MA
Program Director,
Advanced Education in
Pediatric Dentistry
