

NYU Langone Dental Medicine
Postdoctoral Residency Programs

Endodontics (ENDO)

In The Complex World
of Modern Dentistry
Experience Matters

MAKE *YOURS*
EXTRAORDINARY

SUPERIOR PREPARATION

This 25-month, ADA-CODA accredited program is a hybrid blend of both hospital- and dental school-based training. The program emphasizes orthograde and surgical clinical endodontics to build diagnostic experience, teach implant dentistry and re-treatment assessment, and to develop skills for treating patients under sedation or in the operating room.

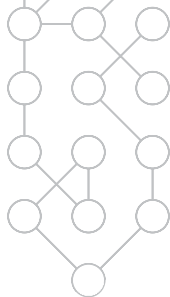

BECOME *YOUR* EXTRAORDINARY

EXCEEDED MY EXPECTATION

"I had a general dentistry background for about eight years. When I was looking at residency programs for this specialty, I wanted one that would give me a good clinical background so I would be able to take care of my patients the best way I can, clinically. This program exceeded my expectations. I like to say, 'team work makes the dream work,' and the great dental assistants, administrators, and front desk staff make the job very pleasant for the residents."

Stanley Michel, DMD
Endodontics Alumnus, 2017,
NYU Langone Dental
Medicine

ENDO AT-A-GLANCE

- Comprehensive didactic curriculum to complement clinical experiences.
- Two training locations: Family Health Centers at NYU Langone Hospital–Brooklyn, NY or University of Puerto Rico School of Dental Medicine.
- Residents can expect to conduct a variety of procedures, working with specialists in orthodontics, pediatric dentistry, prosthodontics, oral surgery, oral pathology, endodontics, orofacial pain and periodontics on a diverse patient population, including those with special needs.
- The program encourages the use of state-of-the-art technologies, including surgical operating microscopes, digital radiography, cone beam computed tomography and ultrasonics.
- Successful completion of the program grants a certificate in endodontics and meets the eligibility requirements for the American Board of Endodontics examination.
- Attractive and competitive stipend as well as comprehensive fringe benefits are offered.

SURGICAL EXPERIENCE

“The endodontic residency program has a very strong surgical component. Second year residents will complete 30-45 surgical procedures which include: mandibular molar apicoectomies, root resections, palatal root surgeries and intentional replantations.”

Robert S. Goldberger, DDS
Program Director,
Endodontics
